#### **\*TERMS OF ACCEPTANCE:**

There are many factors that have an effect on the final results of tanning and mounting of birds and animals, etc. These are primeness, weather conditions, and care of the skin by the sportsman, etc. For these reasons we cannot assume any responsibility or offer any guarantee of the fur dressing of any skin or mounts.

The limit of Dumont Taxidermy's liability for loss or damage to any skin while in our possession shall not exceed its actual reasonable market value. However, we are not responsible for any loss due to natural causes.

#### **\*A NOTE TO THE SPORTSMAN:**

The material used in every mount is of great importance to acquire true-to-life detail. Examples include:

- ~ Glass eyes are implant quality
- ~ Nostrils, ears, and lips are given great detail
- ~ Capes and hides are all tanned professionally
- ~ Birds and life size mounts are placed on natural driftwood or artificial ledge rocks which can include snow, moss, etc., to complete a realistic setting
- ~ Mammal teeth are stained; most tongues and the inner mouth are casted to increase the detail
- ~ Bear rugs have high detail mouth and eyes, three inches of padding tapered on the edges to complete a heavy fur look (even on early fall rugs), and two full layers of felt (not just a two inch border)

*\*DUMONT TAXIDERMY will maintain its position as an innovative leader in the taxidermy industry by providing top of the line, high detail mounts and consistently high quality customer service. "We appreciate your business!"*

**Please note: Prices shown are for taxidermy work on hunter-supplied animals. Deposits required on all work to cover pre-labor, tanning and material costs. Prices subject to change without notice if we experience changes in our costs for supplies. For ready-made mounts, ask for our current Home Décor price list and availability info.**
